Strominger

March 28, 1960

Dear Esther & Josh,

... Nothing like waiting until the last minute to tell you that I'm flying to San Francisco next Sunday night (April 3) and hope to come down to Palo Alto on Tuesday - returning here late Tuesday night. I see from the A.C.P. program that Josh is tied up Tuesday morning, but I hope to see you in the afternoon in any case.

We've just gotten a pile of the TDP-compounds out of Y-10, but I don't know whether it's worth while going back any further in the pedigree of W 3656. Using Y-10 will make the production problem a little simpler. Do you know anything about the K antigens of this line? W 3656

STROMINGER, J.L.

produces a very mucoid capsular (?)
material under some conditions,

Looking forward to seeing you,

All the best,

Jack Stumm
